

为量化私募打造一体化基础设施

从研究 → 回测 → 实盘，将策略上线周期从3周缩短到3天，降低30%+实盘偏差

“我们见过太多优秀的策略团队，因为回测环境与实盘偏差超过30%，上线首日就触发风控——这不是能力的差距，是基础设施的缺失。”

—— TzQuant 创始人

机会

量化交易正成为 机构投资的核心能力

仅头部市场的量化私募管理规模就已突破 ~\$1.8T，过去五年复合增长率超过 25%。量化投资正从边缘策略走向机构主流配置。

然而，一个策略从想法到上线，通常要在数据、研究、回测、执行四套系统间反复切换；数据清洗就占去团队 60% 的时间，工具链的割裂直接造成回测与实盘的偏差。

专业投资者真正需要的，不是更多工具，而是一个将数据、研究、执行与风控融为一体的一站式量化基础设施。

基于自营量化验证的 AI 原生量化研究基础设施

从数据到执行，每个环节都经过精心设计。

数据层

高质量行情、财务与另类数据

研究层

多因子模型与 AI 策略研究

回测层

Tick 级高精度回测引擎

执行层

低延迟实盘交易接入

风控层

事前事中事后全链路风控体系，守护每一笔交易的安全。

竞品分析

聚焦专业投资者需求，TzQuant 在数据、执行与风控上形成差异化定位。

我们不认为功能越多越好。量化机构真正的痛点是“闭环”——策略在哪里研究，就在哪里回测，就在哪里执行。所以我们没有选择功能堆砌，而是选择了最难的路：自研低延迟交易核心和Tick级回测引擎。

平台	AI Agent	开放研究	社区协作	策略执行
WorldQuant BRAIN	△	△	✓	✓
QuantConnect	✗	✗	✓	✓
Numerai	△	✓	✓	✗

RiceQuant	✗	✗	✓	✓
Hugging Face	✓	✓	✓	✗
TZQuant	✓✓	✓✓	✓✓	✓

✓✓ 核心能力 ✓ 支持 △ 部分支持 ✗ 不支持

相比上述平台，TzQuant 从机构客户需求出发，将研究、回测、实盘执行与全链路风控深度融合，并以低延迟交易核心和开放 API 构建可扩展的量化基础设施。

Why now?

多个结构性变化正在推动量化基础设施进入新阶段

AI 正在重构策略研究流程

大模型与自动化工具正在显著降低策略开发门槛，提高研究效率，机构可以更快地生成、测试和优化策略。

多资产交易需求快速增长

机构正在从单一股票策略扩展至股票、期货、期权、加密资产和跨市场套利，多资产环境使系统复杂度显著提升。

机构需求正在升级

机构已经从单一工具需求，转向统一、稳定、可扩展的量化生产环境，需要覆盖研究、回测、执行和风控的完整 workflow。

基础设施生态已经成熟

云计算、实时数据接口、交易API以及计算资源成本下降，使机构级量化平台具备成熟落地条件。

AI 能力成熟

← 策略数量增长

← 系统复杂度上升

← 机构需要统一基础设施

← 量化操作系统时代开始

市场正在从“量化工具时代”进入“量化操作系统时代”

TzQuant 希望成为下一代量化机构基础设施。

已验证的市场吸引力

90% 策略上线周期缩短 从 3 周到 3 天

~\$50M 日均交易额

95%+ 客户月留存率

2.4x 平均机构扩容率

已有 20+ 家机构客户，累计运行 100+ 个策略模型，其中 10 个已进入实盘交易。

过去 6 个月

300% 客户数增长

450% 实盘策略增长

600% 日交易额增长

“以前一个策略从回测到实盘需要 3 周，现在 3 天。TzQuant 让我们敢做更高频的策略了。”

—— 某头部量化私募合伙人

产品

统一量化 workflow

从研究、回测到实盘执行，构建统一量化生产环境

研究

验证

交易

量化研究

统一研究环境，加速 Alpha 发现与策略构建。

- ✓ AI 辅助策略生成
- ✓ 因子分析与信号挖掘
- ✓ Notebook / SDK 协作环境

从想法到可验证策略，仅需数小时

策略回测

真实市场建模，降低回测与实盘偏差。

- ✓ Tick 级事件驱动回测
- ✓ 真实交易成本模拟
- ✓ 多资产、多策略测试

降低回测与实盘偏离

实盘执行

低延迟执行与实时风控的一体化交易环境。

- ✓ 智能订单路由
- ✓ 实时风控监控
- ✓ 多券商统一接入

机构级实盘环境

构建难以复制的护城河

单点功能都可以被模仿，但将研究、执行与生态融为一体的原生架构，需要从第一天就重写底层逻辑。

全链路闭环

研究、回测、实盘、风控一体化，避免数据与策略在多个工具间割裂流转。

低延迟执行

自研交易核心，订单处理延迟低于毫秒级，支持高频与算法交易场景。

真实回测

Tick 级数据与真实交易成本建模，显著降低策略上线后的收益偏离。

开放生态

标准化 API 与插件体系，让客户与第三方开发者共同扩展平台能力。

“这四件事，单做任何一件都不算难。但融于一套原生架构，意味着研究员不再做数据搬运工，策略从回测到实盘无需重写第二遍——我们为此重构了18个月。这不是功能堆砌，是量化基础设施该有的样子。”

清晰的成长路径

已完成

产品验证

核心平台上线，获得 50+ 机构客户，验证产品与商业模式。

2026

规模扩张

拓展数据源与券商接入，覆盖更多资产类别，实现 SaaS 收入规模化。

2027

生态构建

开放平台与策略商城，引入第三方开发者，形成量化策略交易生态。

2028

全球化

拓展港股、美股与衍生品市场，服务亚太地区的专业投资者。

商业模式

多元化收入，
可持续增长

市场

巨大的
结构性机会

SaaS 订阅覆盖基础，交易分成与客户共成长，定制开发服务头部——三层收入结构，层层递进。

SaaS 订阅

按模块与数据量分级订阅，覆盖研究、回测与基础交易需求。

交易分成

基于实盘交易规模收取技术服务费，与客户增长深度绑定。

定制开发

为大型机构提供私有化部署、策略定制与系统对接服务。

ENGLISH VERSION

An integrated infrastructure for quant private funds

Research → backtest → live trading. Cut deployment cycle from 3 weeks to 3 days and reduce live deviation by 30%+.

“We’ve seen too many talented strategy teams trigger risk controls on day one because their backtest environment deviated from live trading by over 30%—this is not a gap in capability, but a gap in infrastructure.”

— Founder, TzQuant

OPPORTUNITY

Quantitative Trading Is Becoming Core to Institutional Investing

In leading markets alone, quantitative private fund AUM has reached ~\$1.8T, with a 5-year CAGR exceeding 25%. Quantitative investing is moving from a niche strategy to an institutional mainstream allocation.

Yet taking a strategy from idea to production typically requires teams to switch back and forth across four separate systems for data, research, backtesting, and execution. Data cleaning alone consumes 60% of their time, and this toolchain fragmentation directly creates divergence between backtest and live results.

What professional investors really need is not more tools, but an integrated quantitative infrastructure that unifies data, research, execution, and risk control.

AI-native Quantitative Research Infrastructure Validated Through Proprietary Trading

Every stage—from data to execution—is engineered with precision.

Competitive Analysis

Built for institutional investors, TzQuant differentiates through data, execution, and risk control.

We don't believe more features make a better product. The real pain point for quant institutions is the closed loop—where strategies are researched is where they should be backtested and executed. So instead of piling up features, we chose the harder path: building our own low-latency trading core and tick-level backtest engine.

Platform	AI Agent	Open Research	Community	Execution
WorldQuant BRAIN	△	△	✓	✓
QuantConnect	✗	✗	✓	✓
Numerai	△	✓	✓	✗
JoinQuant	✗	✗	✓	✓
RiceQuant	✗	✗	✓	✓
Hugging Face	✓	✓	✓	✗
TZQuant	✓✓	✓✓	✓✓	✓

✓✓ Core capability ✓ Supported △ Partially supported ✗ Not supported

Unlike the above platforms, TzQuant is built from the ground up for institutional clients—deeply integrating research, backtesting, live execution, and full-chain risk control, while delivering a scalable quantitative infrastructure through a low-latency trading core and open APIs.

Why now?

Multiple structural shifts are driving quantitative infrastructure into a new phase

AI Is Reshaping Strategy Research

LLMs and automation tools are lowering the barrier to strategy development and accelerating research, enabling institutions to generate, test, and optimize strategies faster.

Multi-Asset Trading Demand Is Growing Fast

Institutions are expanding from single-asset equity strategies into equities, futures, options, crypto, and cross-market arbitrage—significantly raising system complexity.

Institutional Demands Are Upgrading

Institutions are moving from single-point tools toward unified, stable, and scalable quant production environments that cover the full workflow of research, backtesting, execution, and risk control.

The Infrastructure Ecosystem Has Matured

Cloud computing, real-time data feeds, trading APIs, and declining compute costs have made institutional-grade quant platforms viable at scale.

AI capabilities mature

 ←

Strategy volume grows

 ←

System complexity rises

 ←

Institutions need unified infrastructure

 ←

The quant operating system era begins

The market is moving from the 'quant tools era' to the 'quant operating system era'

TzQuant aims to become the next-generation infrastructure for quantitative institutions.

Proven Market Traction

90% Deployment cycle reduced From 3 weeks to 3 days

~\$50M Daily trading volume

95%+ Monthly retention

2.4x Avg. institutional expansion

20+ institutional clients, 100+ strategy models running, with 10 already in live trading.

PAST 6 MONTHS

300% Client growth

450% Live strategy growth

600% Daily trading volume growth

"It used to take three weeks to take a strategy from backtest to live trading; now it takes three days. TzQuant lets us pursue higher-frequency strategies with confidence."

— Partner, Leading Quantitative Hedge Fund

PRODUCT

Unified Quant Workflow

From research and backtesting to live execution—one unified quant production environment

TzQuant Research

A unified research environment that accelerates alpha discovery and strategy construction.

- ✓ AI-assisted strategy generation
- ✓ Factor analysis and signal mining
- ✓ Notebook and SDK collaboration environment

Idea → Strategy within hours

TzQuant Backtest

Realistic market modeling that reduces backtest-to-live drift.

- ✓ Tick-level event-driven backtesting
- ✓ Realistic transaction cost simulation
- ✓ Multi-asset, multi-strategy testing

Reduce simulation-to-live drift

TzQuant Live

An integrated trading environment for low-latency execution and real-time risk control.

- ✓ Intelligent order routing
- ✓ Real-time risk monitoring
- ✓ Unified multi-broker connectivity

Production-ready infra

Building a Defensible Moat

Individual features can be copied, but a native architecture that integrates research, execution, and ecosystem requires rewriting the underlying logic from day one.

Full-Loop Integration

Integration of research, backtesting, live trading, and risk control—preventing fragmented data and strategy flows across multiple tools.

Low-Latency Execution

Proprietary trading core with sub-millisecond order processing, supporting high-frequency and algorithmic trading scenarios.

Realistic Backtesting

Tick-level data and realistic transaction cost modeling significantly reduce post-deployment return deviation.

Open Ecosystem

Standardized APIs and plugin architecture enable clients and third-party developers to extend platform capabilities together.

“Each of these four capabilities is achievable on its own. But fusing them into a native architecture means researchers stop being data couriers, and strategies no longer need to be rewritten from backtest to live trading—we spent 18 months rebuilding the system for this. This isn't feature stacking. It's what quantitative infrastructure should look like.”

Clear Growth Path

COMPLETED

Product Validation

Core platform launched with 50+ institutional clients, validating the product and business model.

2026

Scale Expansion

Expand data sources and broker connectivity, cover more asset classes, and scale SaaS revenue.

2027

Ecosystem Building

Open platform and strategy marketplace, onboarding third-party developers to build a quantitative strategy ecosystem.

2028

Globalization

Expand into Hong Kong, US, and derivatives markets, serving professional investors across Asia-Pacific.

BUSINESS MODEL

Diversified Revenue, Sustainable Growth

SaaS subscriptions cover the base, revenue sharing grows with clients, and custom development serves top-tier institutions—a three-tier revenue model that scales upward.

SaaS Subscriptions

Tiered subscriptions by module and data volume, covering research, backtesting, and basic trading needs.

Trading Revenue Share

Technical service fees tied to live trading volume, closely aligned with client growth.

Custom Development

On-premise deployment, strategy customization, and system integration services for large institutions.

MARKET

A Massive Structural Opportunity

TAM ~\$70B+

Total addressable market for China quant trading technology services

SAM ~\$1.7B

Serviceable addressable market for professional quant platforms

SOM ~\$110M

Target market share over the next 3 years

TEAM

A Team Built by Leaders
in Quant, Tech, and Finance

Cynthia **CEO**

Serial entrepreneur driving TzQuant from lab to institutional clients.

- 2018** co-founded the predecessor project of TzQuant with Leo
- 50+** institutional clients for early commercial validation
- 100** person quant team organizational and delivery framework

Leo **CTO**

10+ years of system architecture, leading AI quant platform and trading core delivery.

- 2011** full-stack practice from blockchain infrastructure to financial systems
- \$1B+** AUM AI-driven quant platform built
- Tick-level** tick-level backtest engine and low-latency trading core delivered

Barry **CFO**

Former Fortune 500 M&A director, leading financing and ecosystem partnerships.

- 5+** years of Fortune 500 investment and M&A experience
- Multiple rounds** funding rounds and equity structuring
- GBA** ecosystem connections with institutional clients, brokers, and data providers
